

Introducing the emerging U.S Leader in Acoustical Wood Ceiling and Wall Panel Systems

TERRACOUSTICS™

TerrAcoustics™ presents your design Trifecta…

BEAUTIFUL, DURABLE, and COST-EFFECTIVE

A NEW ERA IN ACOUSTICS

As an architect or designer, freshness of design can be a distinct competitive advantage. That's why offering new options in design materials is so important to TerrAcoustics™. Our mission is to help you create beautiful and acoustically superior interiors utilizing the sustainability of natural wood.

When your interiors require: 1) beauty, 2) durability, 3) Acoustic performance, and 4) Cost-effectiveness that will delight your clients and their budgets, put TerrAcoustics™ on the top of your short list of preferred vendors. We'll work with you to customize a space, large or small, to meet your client's specific needs.

QUALITY ACOUSTICS

Churches, libraries, conference rooms or concert halls – quality acoustics are paramount to the functionality of these critical spaces. When you can't afford to make a mistake, specify TerrAcoustics™ for:

- Auditoriums
- Performing Arts Center
- Executive Conference Rooms
- Cinemas
- Museums
- TV & Radio Broadcast Studios
- Screening Rooms
- Entertainment Events
- Video Conferencing Rooms
- Restaurants
- Casinos
- Retail Stores
- Giant Screen Venues
- Multimedia Environments
- Night Clubs
- Recording Studios
- Sports Complexes
- Visitor and Business Centers
- Hospitals
- Home Theaters

SUPREME DESIGN

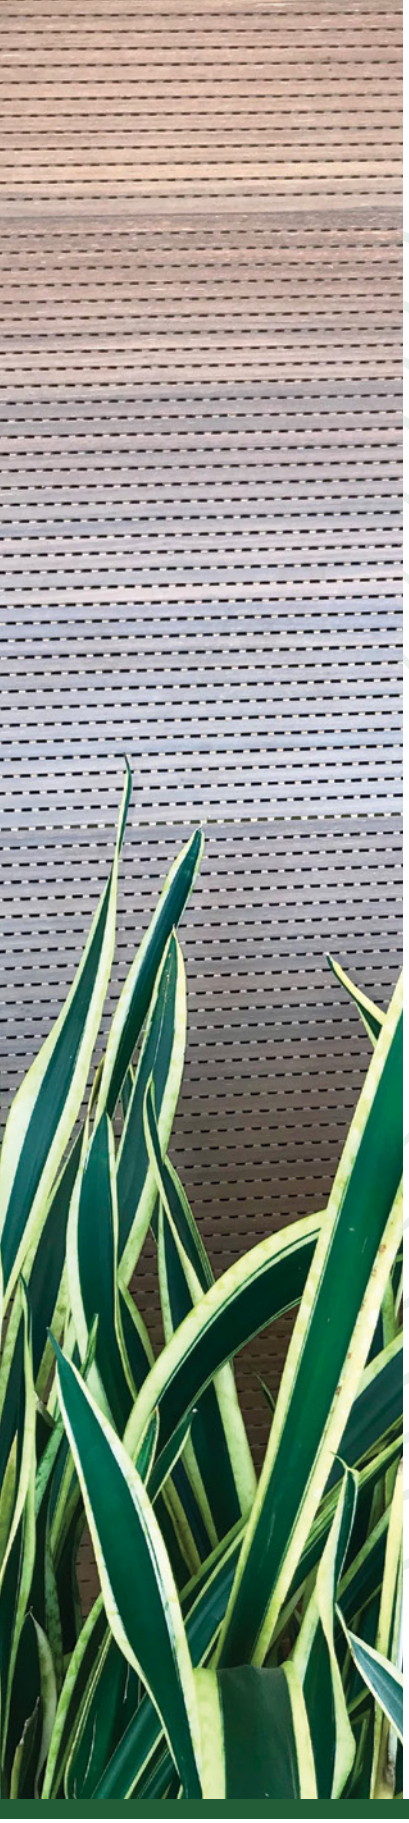

TerrAcoustics™ exclusive product line is highly engineered for sound control.

- Acoustical wall and ceiling panels
- Core material consisting of class A medium density fiberboard (MDF)
- Natural wood veneer selection consisting of six species – Oak, Walnut Crown Cut, Walnut Quarter Cut, Ash Crown Cut, Ash Quarter Cut, and Sapele. Custom wood veneers may be available at an additional cost.
- SoundTex acoustic felt on back of panels
- Non-perforated and reflective pattern panels also available
- Standard MDF thickness : 3/4" or 19 mm
- Clear finish coat applied to the face of the wood veneer. Custom stain finishes available at an additional cost

A NATURAL DECISION

Just as trees vary in size and density, wood acoustic products are not all created equal. There are significant differences in quality, manufacturing, service, ease of installation and price. Here are just a few of the reasons you'll want to specify TerrAcoustics™ for your next project:

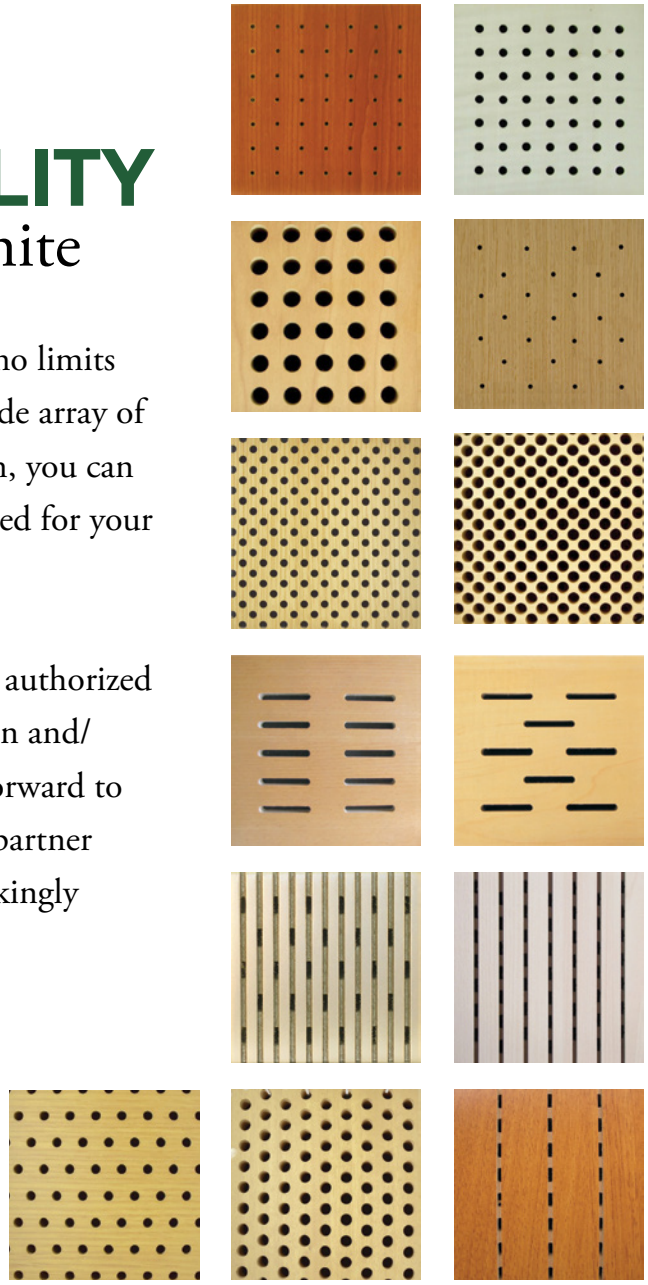

- Cutting edge technology used to manufacture one-of-a-kind products
- Sustainable solutions for use in almost any environment
- Products that provide superior sound control
- Higher standards for quality control
- Cost-alternative methods for achieving your objective
- Client satisfaction – we have a proven reputation for standing behind our products (and you)
- 3 business day budget available
- Custom sizes and stain finishes at affordable prices

Where **BEAUTY** and **TRANQUILITY** Unite

With TerrAcoustics™, there are no limits but your imagination. With a wide array of styles and finishes to choose from, you can achieve the space you've envisioned for your clients at a price they can afford.

Contact TerrAcoustics™ or your authorized dealer today for more information and/or free sample panels. We look forward to serving you and becoming your partner in acoustically superior, breathtakingly beautiful interiors.

Installation instructions available upon request.
